

Telematics

Listen To Your Fleet

MIKE ALBERT
FLEET SOLUTIONS

Telematics - Online FLEET Management

Telematics, a wireless vehicle management system, offers a powerful combination of advanced vehicle location data and remote diagnostic technology, allowing Fleet Administrators to monitor and manage their fleet like never before.

Equipment installed in each vehicle captures information from engine computers and GPS tracking systems. Telematics from Mike Albert is easy to use and easy to have installed. We utilize certified, insured installers to place the equipment in your vehicles; most vehicles require the plug 'n play hardware which connects directly to existing receptors without the need to splice wires.

Telematics Can Help

-  **Lower the cost of doing business**
 - o Lower unnecessary fuel consumption
 - o Reduce costly idle time
 - o Reduce liability and increase driver safety
-  **Increase productivity**
 - o Improve labor efficiency and customer response time
 - o Optimize routing and increase service calls
 - o Reduce unnecessary labor and overtime costs
-  **Improve vehicle utilization**
 - o Eliminate unauthorized vehicle use
 - o Wirelessly monitor vehicle emissions

Lower the Cost of Doing Business

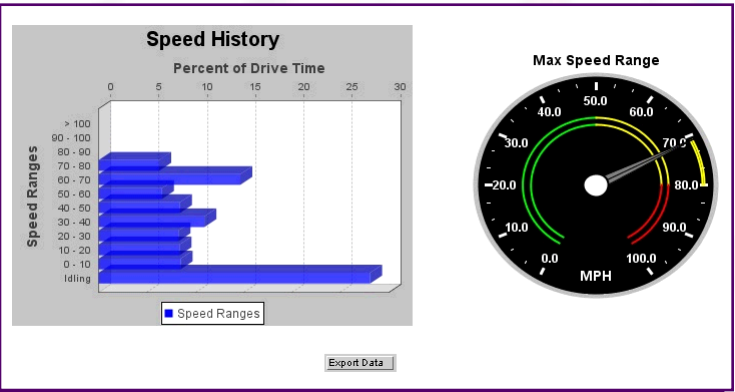

Reduce costly idle time

Idle Time Report											
Vehicle Label	VIN	Year Make Model	Starting Mileage	Ending Mileage	Distance Traveled (Miles)	% of the Time Vehicle Was Idling	Idle Hours	Drive Hours	Total Operating Hours	Max Speed Range	Average MPH
00939374	STDZK23C09S284548	2009 TOYOTA SIENNA	2425	3057	632	9%	1.4	13.0	14.4	70.0-80.0	49
00939384	STDZK23C19S270187	2009 TOYOTA SIENNA	2425	3297	872	16%	4.8	24.3	29.1	80.0-90.0	36
00939371	STDZK23C39S269395	2009 TOYOTA SIENNA	3482	4361	879	26%	6.9	19.7	26.6	70.0-80.0	45
00939370	STDZK23C58S269897	2009 TOYOTA SIENNA	2505	3591	1,086	10%	2.6	24.6	27.2	70.0-80.0	44

By monitoring idle time you can identify areas to increase productivity and reduce fuel usage.

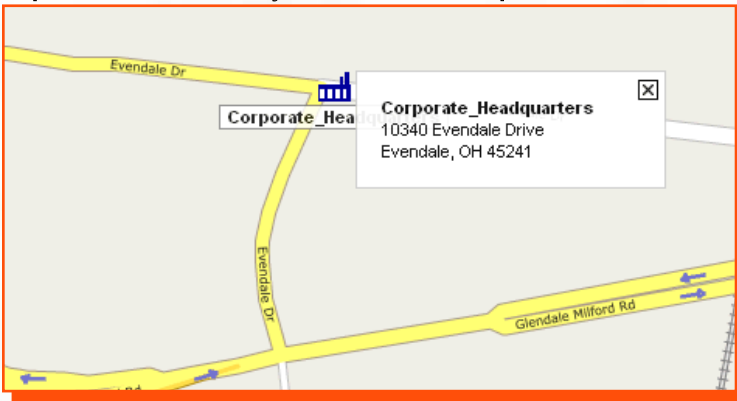

Reduce liability and increase driver safety

By monitoring speed, you can change reckless driving habits before an accident occurs, increasing driver safety and reducing fuel consumption.

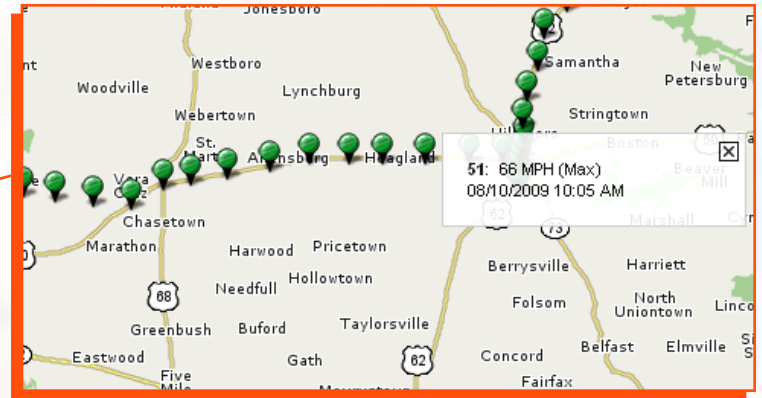

Increase Productivity

Improve labor efficiency and customer response time

User-defined landmarks help you identify where your drivers are in relation to your specific locations. Search for the vehicle closest to a client and improve your customer response times.

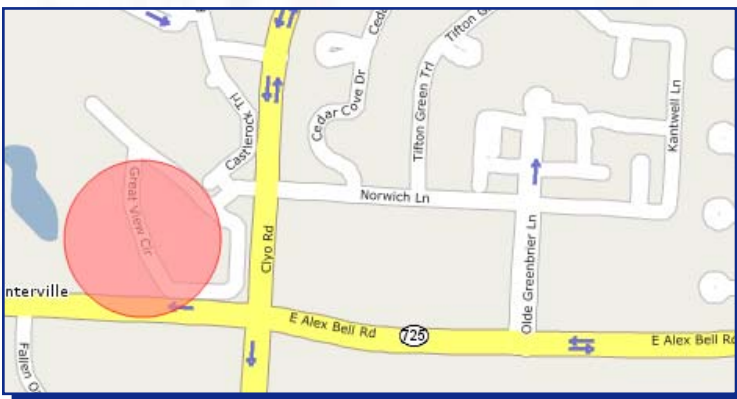

Optimize routing and increase service calls

Tracking where your drivers have been via a "breadcrumb trail" allows you to manage their routes to ensure efficiency.

Improve Vehicle Utilization

Eliminate unauthorized vehicle use

Geofences alert you when a vehicle enters or exits a user-defined area. Reports, such as the odd-hours report, identify when a vehicle is in use during selected hours.

Ensure your fleet stays compliant with wireless emissions information. Telematics even acts as a wireless smog check station for some California vehicles, eliminating the time and expense of traditional smog checks.

Wirelessly monitor vehicle emissions
